Performance data quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Please call 800.548.4539 to obtain performance data current to the most recent month-end.

Fixed-income funds are subject to the risks associated with investments in debt securities, such as default risk and fluctuations in the perception of the debtor's ability to pay its creditors. Changing interest rates may adversely affect the value of a fixed income investment. An increase in interest rates typically cause the value of bonds and other fixed-income securities to fall.

Investments in foreign securities are subject to additional risks such as erratic market conditions, economic and political instability, and currency exchange rate fluctuations. Emerging markets may accentuate these risks. Small cap and micro cap investments are subject to greater volatility than investments in other asset categories.

AMG Funds are distributed by AMG Distributors, Inc., a member of FINRA/SIPC.
